School Wide:

Every Thursday: Cooking Experiment (STEM) Every

A+ Kids Fundraiser for Children with Fatal / Life Threatening Disorders

Children's Miracle Network

A+ Kids are taught to serve the community

How donations helped Drew:

CMN Hospitals' funds are helping to pay for a building expansion at Drew's children's hospital. Donations also cover equipment like syringe pumps and a transport ventilator, which helps stabilize kids like Drew between surgeries.

Do you want to make a difference?

UCF MORALE representatives will be tabling in the front office the next few weeks to raise awareness for fundraising needs with Arnold Palmer Hospital, as well as, how you can help. This group of young college students are joining forces with local schools to raise money for children with fatal and life threatening disorders.
